Request for Council Approval – New Beer Lines installed in Sports Grill walk-in cooler.

City Council,

I am asking for your approval of the attached proposal from Northern Draft to redo our beer lines in the walk-in cooler. Our walk-in cooler is small, and houses bottled beer, refrigerated food and condiments, and 11-16 kegs of beer at any given time. The current set up is messy, cluttered, and most importantly unsafe. This is not only my opinion, but also the opinion of my bartenders who have to change the kegs, our beer distributor sales men who count and monitor our kegs, and our beer distributor delivery drivers who remove empty kegs, reorganize current kegs, and deliver new kegs.

The clutter of the kegs is a safety issue for bartenders when they change kegs – bartenders are sometimes climbing over slippery kegs, squeezing in between kegs, and lifting kegs out from tight spaces. The floor is often slippery around the kegs from condensation and occasional spills, and the tight space makes it challenging to keep the floor clean and dry. It is a challenging and unsafe situation.

Additionally, the current set up is outdated and has also led to multiple problems including beer lines freezing, pouring foamy beer, and not functioning at all.

Northern Draft designed a new layout for our small space, and has proposed the attached estimate to redo the beer lines. This upgrade would make our walk-in cooler cleaner, safer, better organized, and would eliminate any wasted beer when kegs are changed by upgrading to a modern set-up.

I am asking for your approval to install a new system in our walk-in cooler to make it safe and sanitary.

Thank you for your consideration in this matter.

Aerica Benson
