

Watermain Shut Down Notice

Notice Distributed: Monday, June 24th, 2024

A water shutdown on your street (311th) is scheduled to occur on **Monday, July 1st, 2024**.

Your water will be turned off at **10:00 a.m.** to allow the city to work on the water distribution system.

We will do our best to restore your water service as soon as possible. We anticipate water service to be restored before/by **12:00 p.m.**

When water service returns, you may see cloudy water. This is due to air in the lines, please leave a faucet running in your home for 5-10 minutes and the water will clear up.

We realize that this work will be inconvenient at times. We appreciate your patience. If you have any questions or comments, please reach out via the contact details below.
